SUMMARY

Software Engineering student and aspiring Software Developer with strong backend and frontend development skills, supported by hands-on experience in system design, development, testing, and debugging across multiple real-world projects. Background from a Tahfiz school has instilled strong discipline, adaptability, and attention to detail, enabling rapid adoption of new frameworks and technologies.

Technical Focus: Full-Stack Web Development, Backend Systems, Automation

EDUCATION

Bachelor of Information Technology (Hons) in Software Engineering University Kuala Lumpur (MIIT) CGPA: 3.81	Sep 2022 - Feb 2026
Foundation in Computer Technology University Kuala Lumpur (MIIT) CGPA: 3.93	Aug 2021 - Aug 2022

WORK EXPERIENCE

Web Developer Intern Latitude Innovation Sdn. Bhd.	Sep 2025 - Feb 2026
- Contributed to backend and frontend development across 5+ production projects using Laravel, Next.js, Filament, and WordPress (Elementor, WooCommerce). - Assisted in system integration, testing, and debugging, helping deliver stable deployments and reducing post launch issues by 30%. - Managed domain registration, server configuration, Cloudflare setup, and SMTP email integration for multiple client websites, ensuring reliable uptime and email delivery. - Supported website design, client coordination, and technical documentation, enabling smoother project handovers and faster client onboarding. - Improved system performance and scalability through Docker-based deployments and MySQL optimization. - Supported consistent development and release workflows using GitHub version control.	
Lecturer Assistant: Principles of Computer Programming University Kuala Lumpur (MIIT)	Oct 2023 - Mar 2024
- Assisted in conducting weekly lectures and practical sessions for 50+ students, covering core programming concepts. - Provided one-on-one academic support and debugging assistance, improving student understanding and problem-solving skills. - Supported preparation of course materials, lab exercises, and assignment grading, contributing to efficient course delivery and assessment processes.	

DIGITAL PROJECT EXPERIENCE

Internship Projects:	Sep 2025 - Feb 2026
Title: Malaysia's Biggest Online Auction - Designed and developed a real-time live auction system supporting 100+ concurrent bidders during peak auction sessions. - Implemented backend services using Laravel Filament and frontend interfaces using Next.js, deployed via Docker for consistent environments. - Integrated WebSocket communication to deliver sub-second bid updates, improving bidding responsiveness and user experience. - Managed secure transactional data using MySQL, ensuring data integrity and reliability across all auction events. - Conducted end-to-end system testing, debugging, and performance validation, and supported client training and technical documentation, reducing post-deployment issues by 30%.	
Title: Air Conditioning Service Management System Executed comprehensive system testing and logged 10+ issues using GitHub Issues, contributing to improved system stability and release readiness.	

- Refined backend admin interfaces and workflows using Laravel Filament, improving usability and reducing admin task time by 25%.
- Designed and implemented database seeders and model factories to support development, testing, and staging environments.
- Created and maintained developer documentation using VitePress, improving onboarding efficiency for new developers.

Title: *School Bookshop Management System*

- Developed an online bookshop platform for schools using WordPress and WooCommerce, supporting hundreds of orders per school term.
- Built and customized PHP plugins to automate bulk email notifications and streamline order management, reducing manual processing by 40%.
- Implemented Python automation scripts to accelerate report generation and operational data processing, cutting reporting time from hours to minutes.
- Performed plugin debugging, optimization, and feature testing, improving system performance and reliability.

Title: *ESG Consultancy Website*

- Developed and managed a professional consultancy website using WordPress, covering design, content structure, deployment, and maintenance.
- Conducted client meetings to gather requirements and delivered regular content updates and site improvements.
- Configured and verified the website on Google Search Console, ensuring proper indexing and improved search visibility.
- Diagnosed and resolved email configuration and delivery issues, achieving 100% successful outbound email delivery for business communications.

Title: *Preschool Website Network*

- Developed and managed a multi-site network of preschool websites (5+ sites) using WordPress, ensuring responsive design and strong SEO performance.
- Handled Cloudflare DNS, domain configuration, and hosting integration to maintain stable and secure website operations.
- Completed Google Search Console indexing and full pre-launch technical checklists, improving search visibility and launch readiness.
- Managed deployment, testing, and client coordination, delivering on-time launches across all preschool sites.

Final Year Project: Degree

Oct 2024 - Jun 2025

Title: *DriveFlow - Driving School Management System*

- Built a full-stack web application using PHP, MySQL, and Bootstrap with automated license booking, scheduling, and payment processing.
- Digitized previously manual, paper-based workflows, improving operational efficiency by 50% for driving school administrators.
- Delivered a centralized platform supporting students, instructors, and administrators with role-based access.

TECHNICAL SKILLS

- Programming Languages: Java, PHP, Python, JavaScript, C#
- Frontend & Web Technologies: HTML5, CSS3, Bootstrap, Responsive Web Design
- Frameworks & Libraries: Laravel, Filament, Next.js, React.js, ASP.NET MVC, Flutter
- CMS & E-Commerce: WordPress, WooCommerce, Elementor, Custom WordPress Plugins
- Databases: MySQL, SQLite
- DevOps & Development Tools: Ubuntu Linux, Git, GitHub, Docker, WebSocket, Cloudflare, PuTTY, XAMPP
- Development Concepts: REST APIs, System Integration, Automation

PROFESSIONAL SKILLS

Effective Communication, Team Collaboration, Problem Solving, Rapid Adaptation, Fast-Paced Execution, Time Management, Adaptability.

LANGUAGES

Bahasa Melayu (Native), English (Professional Working Proficiency)

CERTIFICATIONS AND TRAINING

- Coursera: Google Project Management Professional Certificate.
- Microsoft Certified: Azure AI Fundamentals

- CompTIA Cloud+ ce Certification
- Cisco IT Essentials
- Top Coders 2024 - Python Programming
- SwiftUI Academy - iOS Development
- Program Usahawan Peranti SPACE

EXTRACURRICULAR ACTIVITIES

- GreenCity AR Competition – Silver Award: Designed an Augmented Reality green city prototype
- Debate Bootcamp: Enhanced public speaking and critical thinking skills
- Online Business Challenge: Developed and presented online business model
- Innovation TVET Competition: Showcased creative problem-solving in tech innovation
- MARA Mentorship Program: Participated in a networking initiative with CEOs and senior executives from leading organizations

AWARD AND ACHIEVEMENTS

- Best Student Award - Foundation in Information Technology
- Best Student Award - Kursus Kejurulatihan Silat
- Deans List Award - Sem 1, 2, 3, 4, 5 and 6
- Black Belt Taekwondo and Red Belt Silat
