SUMMARY

Backend Software Developer specializing in Laravel and the Filament admin stack - the toolset I have used to build 3+ management systems and a real-time auction platform serving 100+ concurrent users at my current company. I deliver well-tested backend services, set up Docker deployments and CI/CD pipelines from scratch, and automate manual workflows so engineering teams ship faster and more reliably.

SKILLS

Languages: PHP, Python, Java, C#

Backend & Frameworks: Laravel, Filament, REST APIs, ASP.NET MVC

DevOps & Deployment: Docker, GitHub Actions (CI/CD), Git, Linux (Ubuntu), Cloudflare, PuTTY

Databases: MySQL, SQLite

WORK EXPERIENCE

Software Developer

Mar 2026 - Present

Latitude Innovation Sdn. Bhd.

- Built and shipped backend features across 6+ production systems using Laravel, Filament, Docker, and MySQL.
- Configured GitHub Actions CI/CD pipelines across 3+ repositories, cutting manual deployment steps to zero.

Web Developer (Intern)

Sep 2025 - Feb 2026

Latitude Innovation Sdn. Bhd.

- Engineered the real-time auction backend supporting 100+ concurrent users, reducing post-launch issues by 30% across 5+ projects.
- Configured DNS, server environments, and SMTP for 10+ client websites, achieving 100% email delivery.

Lecturer Assistant - Principles of Computer Programming

Oct 2023 - Mar 2024

Universiti Kuala Lumpur (MIIT)

- Supported weekly lectures and labs for 50+ students, providing 1-on-1 debugging and programming guidance.
- Prepared lab exercises and graded assignments for 6 months of coursework delivery.

PROJECTS

Malaysia's Largest Online Auction System

- Engineered backend services and real-time bidding for a live auction supporting 100+ concurrent users; secured all transactional data in MySQL.

School Donation (Sumbangan) Management System

- Built from a fresh project: set up the GitHub CI/CD pipeline, staging and production server environments, and developed backend features end-to-end.

Service Management Systems (Air-Conditioning · Gym · Car Service & Warranty)

- Delivered backend features, admin interfaces, and CI/CD workflows across 3 internal systems; reduced admin task time by 25% and resolved 10+ logged issues via GitHub Issues.

EDUCATION

Bachelor of IT (Hons) in Software Engineering (CGPA 3.81)

Sep 2022 - Feb 2026

Universiti Kuala Lumpur (MIIT)

Foundation in Computer Technology (CGPA 3.93)

Aug 2021 - Aug 2022

Universiti Kuala Lumpur (MIIT)

CERTIFICATIONS

Google Project Management (Coursera) · Microsoft Certified: Azure AI Fundamentals · CompTIA Cloud+ · Cisco IT Essentials · Top Coders 2024: Python Programming · SwiftUI/iOS Cert.
